The leader of the PSD, Manuela Ferreira Leite said today she had told the truth and helped the government by warning that, if nothing was done, Portugal could get into the same situation as Greece.

“If the government did not understand it like that, this means it is completely unaware of reality, completely unaware of what the country needs, and is, once again, incapable of asking the Portuguese for the sacrifices that have to be imposed, because they continue not to wake up to reality”, Ms Ferreira Leite said.

The MP and leader of the PSD was speaking at the end of a meeting of the social democrat parliamentary group in parliament.
